Ok, thanks for the info. The meeting that Amy is working on setting up with Leanne and Rich would be a good starting point for discussing our overall strategy, but it's good to know that I need to be keeping Dan informed of those conversations as well.

Jayne –

I do not expect that things necessarily will develop quickly while Dave is out, but I checked on a couple of things in a Thursday conversation with Heather, so I wanted you to be aware in your acting capacity.

(b) (5)

The other item we discussed was Ecology's preferred level of involvement in other disapproved segment/pollutant pairs. On this question, we had the understanding that Ecology was not that interested in steady engagement unless it is something that is likely to have impacts on their work downstream (e.g. Budd Inlet). I described to her the work we were doing to nail down our overall project plan, and this had her thinking about different ways/times it might make sense to engage. For instance, she is considering whether it might be good for us to go through our strategy with them before we lock it down, and whether from there periodic check-in between her and me or something else would work. Again, she wants to circle back and get back to us.

Thanks.
